Even if the respondent meets the 70 mark cut-off and does not meet this criterion of 80% compliance, the respondent would have deemed not to be meeting the RFP Technical requirements. The Technical Proposal will be evaluated for technical suitability and the criteria for evaluation of technical bids are as under:

Criteria	Evaluation Parameters	Sub Scores
The number of PMS Implementation carried out in the last 3 years (starting from 01-04-2018 till RFP submission date) (Implemented for Banking Clients in India with user base of at least 15,000) **	For each Implementation 2 marks	10

E.7 Weighted Evaluation:

On the basis of the combined weighted score for technical and commercial evaluation, the bidders shall be ranked in terms of the total score obtained. The proposal obtaining the highest total combined score in evaluation of quality and cost will be ranked as H-1 followed by the proposals securing lesser marks as H-2, H-3 etc. The proposal securing the highest combined marks and ranked H-1 shall be recommended for award of contract.

As an example, the following procedure can be followed:

- A score (S) will be calculated for all qualified bidders using the following formula:
- [(T/T_{high})*100]*0.75+ [(C_{Low}/C)]*100*0.25
- T stands for Technical Score arrived on the basis technical evaluation
- Thigh stands for highest technical score arrived on the basis technical evaluation
- C stands for Nominal Bid Price arrived on the basis of commercial evaluation
- CLowstands for the lowest Nominal Bid Price arrived basis of commercial evaluation

#	Bidder	Tech Score	[(T/T _{high})*100]*0.75 Tech Eval Marks A	Nominal Bid Price C	[(CLow/C)]*100*0.25 Commercial Eval Marks	Score (S = A +B)
1	AAA	75	75/90*100*.75= 62.49	120	100/120*100*.25= 20.83	83.32 (H-3)
2	BBB	80	80/90*100*.75= 66.66	100	100/100*100*.25= 25	91.66 (H-2)
3	CCC	90	90/90*100*.75 = 75	110	100/110*100*.25=22.72	97.72 (H-1)

In the above example, C_{Low} is 100.

In the above example, CCC, with the highest score becomes the successful bidder.

In case of more than one respondent with equal highest score (S) up to three decimal, then number of decimal will be increased.

The decision of the Bank shall be final and binding on all the respondents to this document. The Bank reserves the right to accept or reject an offer without assigning any reason whatsoever.

If a Force Majeure situation arises, the vendor shall promptly notify the Bank in writing of such conditions and the cause thereof within fifteen calendar days. Unless otherwise directed by the Bank in writing, the vendor shall continue to perform vendor's obligations under this Agreement as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

If the duration of delay continues beyond a period of three months, the Bank and vendor shall hold consultations in an endeavour to find a solution to the problem.

G.8 Termination

Bank shall have option to terminate/cancel this RFP at any stage without any prior notice. In following events Bank shall terminate this assignment or cancel any particular order if Respondent:

- breaches any of its obligations set forth in this assignment or any subsequent agreement and Such breach is not cured within thirty (30) Working Days after Bank gives written notice; or
- failure by Respondent to provide Bank, within thirty (30) Working Days, with a reasonable plan to cure such breach, which is acceptable to the Bank. Or

- The other Party is subject of an effective resolution for its winding up other than a voluntary winding up for the purpose of reconstruction or amalgamation upon terms previously approved in writing by the other Party; or The other Party becomes the subject of a court order for its winding up.

Notwithstanding above, in case of change of policy or any unavoidable circumstances Bank reserve the right to terminate this assignment or any subsequent agreement and / or any particular order, in whole or in part by giving Vendor at least 30 days prior notice in writing.

The Vendor understands the largeness of this Project and that it would require tremendous commitment of financial and technical resources for the same from the Vendor for the tenure of this Tender and subsequent Agreement. The Parties therefore agree and undertake that an exit at any point in time resulting due to expiry or termination of this Tender and subsequent Agreement for any reason whatsoever would be a slow process over a period of six (6) months, after the completion of the notice period of three (3) months. During this period, the Vendor shall continue to provide the Deliverables and the Services in accordance with this Tender and subsequent Agreement and shall maintain the agreed Service levels.

Immediately upon the date of expiration or termination of the Agreement, Bank shall have no further obligation to pay any fees for any periods commencing on or after such date.

Without prejudice to the rights of the Parties, upon termination or expiry of subsequent Agreement, Bank shall pay to Vendor, within thirty (30) days of such termination or expiry, of the following:

 commercial endeavors to transfer or assign such agreements and Vendor Equipment to Bank and its

- Upon Bank's request in writing, Vendor shall be under an obligation to transfer to Bank or its designee(s) the Deliverables being used by Vendor to perform the Services free and clear of all liens, security interests, or other encumbrances at a value calculated as stated.

In the event the Bank terminates the Contract in whole or in part, the Bank may, among other applicable remedies, procure Goods, Works or Services similar to those undelivered upon such terms and in such manner as it deems appropriate, and hold the Vendor liable to the Bank for any excess costs for such similar Goods, Works or Services. However, the Vendor shall continue performance of the Contract to the extent not terminated.

The Bank will provide the selected vendor a remedy period of 30 days to rectify a default or given situation. The Bank will provide in writing the nature of the default to the selected vendor through a letter or mail correspondence. The 30 day time period will commence from the day the Bank has sent such correspondence to the selected vendor.

The Bank reserves its right to cancel the order in the event of one or more of the following situations, that are not occasioned due to reasons solely and directly attributable to the Bank alone and it will be considered as a breach of obligations of vendor:

• Delay in implementation beyond the specified period that is agreed in the contract that will be

signed with the successful vendor.

- Discrepancy in the quality of service / security expected during the implementation, rollout and subsequent maintenance process.
- Delay in procurement and installation of any IT infrastructure and applicable software. Permissible time for procurement and installation is 6 weeks.
- The amount of penalties has exceeded the overall cap of 5% of the total contract value in any year during the contract period.
- Failure of the vendor makes good the situation within the remedy period

In case of order cancellation, any payments made by the Bank to the Vendor for unacceptable deliverables would necessarily have to be returned to the Bank with interest @ 15% per annum from the date of each such payment. These payments to be returned would refer to those deliverables that will have to be reversed or redone post the termination of the vendor.

As part of Reverse Transition Services, Bank shall have the right, and Vendor shall not object to or interfere with such right, to contract directly with any Vendor's subcontractor.

G.9 Contract Review

The Bank desires to appoint the successful vendor for a total period of 3 years, considering the effort and investments required in the arrangement. However, understanding the complexities of the entire arrangement and to safe guard the interests of all the entities involved in the arrangement, the Bank would like to have options to revisit the arrangements and terms of contract as well as to re-price the same after the contract term on mutually agreed terms if necessary. Solely at the discretion of bank, contract may be renewed for another 2 years between the parties subject to their mutual agreement on the period of renewal.

The Bank expects the benefits from any un-anticipated decrease in technology infrastructure costs, over the term of the contract due to reduction of prices, efficient use of IT infrastructure / reduction of statutory charges, etc. and operations management methods that yield more efficient operations, to be passed on through re-negotiation. No conflict between the successful vendor and the Bank will cause cessation of services. Only by mutual consent the services can be withdrawn. This would include a well-defined reverse transition mechanism, which would normally require 3 to 6 months and will contain:

- Procedures for transition and migrating to the new service provider
- Time frame for parallel run
- Skill transfer mechanism and in specific cases the human resources requirement.

G.10 Subcontracting

The vendor shall not subcontract or permit anyone other than its personnel to perform any of the work, service or other performance required by it under this assignment without the prior written consent of Bank.

However, (i) the Vendor has sole control of the defense and all related settlement negotiations (ii) the Bank provides the Vendor with the assistance, information and authority reasonably necessary to perform the above and (iii) the Bank does not make any statements or comments or representations about the claim without the prior written consent of the Vendor, except where the Bank is required by any authority/regulator to make a comment/statement/representation.

If use of deliverables is prevented by injunction or court order because of any such claim or deliverables is likely to become subject of any such claim then the Vendor, after due inspection and testing and at no additional cost to the Bank, shall forthwith either 1) replace or modify the software / equipment with software / equipment which is functionally equivalent and without affecting the functionality in any manner so as to avoid the infringement; or 2) obtain a license for the Bank to continue the use of the software / equipment, as required by the Bank as per the terms and conditions of this Tender and subsequent Agreement and to meet the service levels; or 3) refund to the Bank the amount paid for the infringing software / equipment and bear the incremental costs of procuring a functionally equivalent software / equipment from a third party, provided the option under the sub clause (3) shall be exercised by the Bank in the event of the failure of the Vendor to provide effective remedy under options (1) to (2) within a reasonable period which would not affect the normal functioning of the Bank.

The Vendor shall not be liable for defects or non-conformance resulting from:

Software, hardware, interfacing, or supplies for the solution not approved by Vendor; or

 Any change, not made by or on behalf of the Vendor, to some or all of the software/deliverables supplied by the Vendor or modification thereof, provided the infringement is solely on account of that change;

Indemnity would cover damages, loss or liabilities suffered by the Bank arising out of claims made by regulatory authorities for reasons attributable to breach of obligations under this RFP and subsequent agreement by the Vendor.

In the event of successful vender does not fulfill its obligations under this clause within the period specified in the notice issued by the CBI, Bank has the right to recover the amounts due to it under this provision from any amount payable to the vendor under this project.

The vendor is not absolved from its responsibility of complying with the statutory obligations as specified above. Indemnity shall exclude indirect, consequential and incidental damages.

1. Functional Specifications

The consultant will review and conduct gap analysis of the existing Performance Management/HR Systems & processes; assess implementation gaps, besides suggesting adequacy of the current HR systems of the Bank. The analysis should include proposed strategy for each area and its derivatives in comparison to the similar systems followed by domestic and global peers, regulatory guidelines, future requirements in changing banking scenario and suggest best in Industry model.

The Consultant will need to review and conduct gap analysis for the below mentioned areas:

1.1. Organization Structure Realignment

The consultant will analyze the existing organization structure of the Bank to identify gaps as compared to peers and best in class benchmarks to help achieve better productivity, empowerment and accountability. The consultant will also analyze the need for realignment of top-level organization structure as relevant, define a Clear Structure with some minor tinkering for smooth implementation and promote performance as per needs

The proposed solution should have specific modules for defining the org. structure & hierarchy along with role clarity.

Organization Module / Organization Hierarchy:

Every employee should know his/her reporting authority, scale, designation, role and other aspects including details of reportees. This module will help employee in identifying the employee related information captured in performance measurement & management system. This will be used for looking at reporting structure by each employee, raising requests for modification in reporting structure and allocating Reporting authorities by the Admin. Organization module also deals with change triggers required for making changes in employee related parameters.

Role Clarity Module:

Role clarity module should be present for providing clarity to officers in terms of their roles, KRAs and targets. On allocation of the roles, employees will get to know their roles, KRAs and corresponding weights, and targets on which they are being assessed. Current PMMS is based on role-wise structure where the roles are divided into two broad categories as Budgetary & Non-Budgetary Roles

1.2. KRA& KPI designing for employees based on their role& individual target

Setting up KRAs and performance indicators of employees

- 1. Identify different job roles across different operating units, including head office departments, geographic units, and special-purpose units. The job roles should cover all officers and clerical staff of the Bank
- 2. KRAs to de defined for various business, support and control functions in branches / offices / controlling offices /corporate offices including non-business functions / roles.
- 3. KRAs must be indexed towards measuring outcomes for tasks performed rather than activities performed
- 4. KRAs must be action inducing and sourced primarily from leading indicators instead of lagging indicators.
- 5. While setting up KRAs for different job roles, the KRAs should be defined such that:
 - They are objective and measurable to the extent possible.
 - They comprehensively reflect the duties of employees in those specific roles
 - They reflect the requirements with respect to business growth, customer service, risk management, compliance and employee productivity
 - Min 6 Max 10 KRAs per role to ensure balance of granularity & ease of monitoring
- 6. Set up performance indicators that have operationally feasible ways of measurement with adequate and objective clarity
- 7. Develop a tool/software application that is usable across Bank's offices& officials, for allocating roles & KRAs

to all employees across field, region, zonal and head offices. The tool must have the following features

- Role library
- Assignment of roles to all subordinates by a supervisor as per job allocation
- Assignment of multiple roles to a single individual

1.3. Target setting for the employees based on overall Bank business targets

Target-setting involves scientifically identifying and fixing job roles of incumbents, clubbing of similar job roles, redefining both functional and administrative key responsibility areas (KRA) with proper measurability for all the roles and assigning of time bound targets based on defined performance metrics for all verticals of the Bank under a Two-way approach, i.e. Top to bottom and Bottom to top approach. Time bound targets are to be fixed on a monthly, quarterly, half yearly or annual basis and are to be communicated appropriately to the concerned employee. The aim is to create an environment of challenges for the employees and to make them redefine their individual and group goals. The strategy of target setting shall help to redefine transparency and accountability in the organization.

The major areas of delivery for the designing and implementing Target Setting Tool would be as under:

- 1. The targets should be in line with the KRAs set and both should be such that they are measurable at least to the extent of the benchmark set for the banks
- Corporate Mission/ Goals/ Product wise Strategy / Operational Plans & Strategies → Performance Budgets
 → Time-bound & measurable Targets including targets defined in terms of various products (Corporate to zones, zones to regions, regions to Branches and Branches to individual employees)
- 3. Tracking the performance and Alert System (Flags)
- 4. Define scientific approach to sub-divide business targets of the bank across different operating units, including
 - Head-office departments
 - Geographic units, e.g., zonal/regional offices and branches,
 - Special-purpose units, e.g., back-office processing centres
- 5. Establish process and governance mechanism for centralized review of sub-divided targets and final approvals
- 6. Develop methodology to finish target setting process in 4-5 weeks' time including developing a tool, which should be usable across all offices, by which the target cascading process can be repeated from time to time. The tool must facilitate
 - Cascade business targets across the organization hierarchy, starting from head-office to verticals, zonal/regional office and branches
 - Ability to allocate Individual employee-wise Target setting
 - Top-down as well as bottom-up target setting option should be provided
 - Target setting for multiple business parameters
 - No buffers across the process

- 7. Provide historical and market data-driven guidance & insights to help set scientific targets at a last-mile level
- 8. Provide differentiated and scientific targets generated from market, branch & peer group analytics
 - Auto-capture of deviations & exceptions to build institutional memory
 - Maker-checker-validator workflows for target setting governance
 - Dashboards & templates for progress review & monitoring
 - Ability to reassess & realign target based on prevalent situations

1.4. Digitally Enabled Performance Measurement & Management (Performance Management Analytics, Review and Reward system):

- 1. Design and deploy a digitally-enabled performance management system, to be repeatedly used by all officials of Bank, with the following features:
 - Employee-level visibility of their targets, KRAs, and performance indicators
 - Linkage of individual performance parameters with various business and operational data from other Bank systems
 - Employee-level dashboard with a view of their performance against targets
 - Performance culture institutionalized through KRA visibility, peer comparisons & analytics-driven interventions
 - Consolidated performance dashboards at operating unit level
 - Dashboard for supervisors showing most recent monthly/quarterly performance of all direct reportees
 - Dashboard for HR for tracking performance of all employees
 - Dashboard for HR for tracking appraisal status of all employees
 - Comparison features
 - Analytics driven projection of employee performance for the year
 - Visibility & insights on monthly performance
 - Objective grading framework that distinguishes top performers
 - Monthly, quarterly, semi-annual, and annual level reports
 - FAQ and support
 - Continuous feedback facility with on-tool feedback status tracking
 - Auto-escalation of appraisal if not closed within timelines (after end of FY)
 - Tool should be available both in English & Hindi
 - Tool should be easy to use for PWDs as well
- 2. The performance dashboards, as described above, should be available to the employees on their desktop computer devices as well as mobile devices
- 3. The performance dashboards should be available to the employees and their respective chain of reporting
- 4. Scope for MTD/QTD/YTD scores and peer comparison should be available. Focus areas or areas of improvement should be highlighted & facility to communicate the same to employees frequently to be provided
- 5. Devise roadmap for transition from the current performance management system, processes to the target system, processes
- 6. Design governance mechanisms and performance review cycles based on the digitally-enabled performance management system
- 7. Design solution to implement the grading framework & criteria for creation of Cohorts. The performance of employees must be compared with officers working within same cohorts.
- 8. The system must also provide regular feedback on performance to the employee and suggest course correction measures such as business opportunities to be tapped, best practices to be sought, etc. Training

interventions could also be customized for capacity/ performance improvement.

9. Engagement scores related to Manager Feedback can also be included in PMMS.

Performance Measurement and Analytics

The envisioned system should auto-generate scores based on the Key Result Areas of the employee concerned with least or no manual intervention. For the said automation, linkage to various databases like LMS/MIS/HRMS etc. can be used. For non-budgetary roles, where quantifying targets poses difficulty, a suitable mechanism must be designed and implemented to remove subjectivity in marking.

The performance measurement & management system must serve to increase business orientation among employees, by being an effective tool that clearly spells out expectations of work performance and consequent rewards. It must successfully instill feeling of ownership & accountability among employees. The KRAs, target set and achievement of the individuals should flow into the Bank's existing PMMS solution.

Cohorts & Grading

Cohorts are groups of officers performing similar type of roles and working in similar geographies, contexts and constraints. The cohorts should be created for the following categories which will cover all the officers in the Bank, but system should have scope to add/remove the Cohort Categories

The cohorts once identified have to be linked with the assessment part of the Performance measurement & management System as mentioned below:

- The performance of officers will be compared with officers working within same cohort.
- The absolute marks obtained by employees in each cohort will be converted into grades.
- There should be an option to merge two or more cohorts into one depending upon the no. of officers in them.

Performance Analytics:

This entails using statistical techniques for -

- Data analytics on the PMS scores to gain insights on scoring trends over the previous years, to enable corrective action for unhealthy trends.
- Using analytics for in depth analysis of the unit-wise performance of the organization with insights on improving it further: This may include, but not be restricted to insights on performance of different businesses / products; comparative analysis with competitors in different geographies / market segments, etc. The competitors here will be peer banks operating in India.

In this way, as against a one-time year-end appraisal, the system must use the latest technology to show monthly and quarterly performance of an individual, a business unit as well as the Bank as a whole, with performance trends over time.

The envisioned PMMS should be able to draw suitable inferences about the performance of the employee and throw insights for corrective action to improve performance. The system should be able to make suggestions to improve performance in specific business parameters. These suggestions would extend to the overall performance of the Branch/Region/Zone/Bank as a whole.

There must be comparison of performance of an employee, with others performing in the same role that is, band or cohort comparison, to give a rounded perspective on self-performance.

Performance Review and Analytics

The solution should allow for daily/monthly/quarterly/half yearly/yearly review of performance. The proposed system will provide course correction measures in the form of business opportunities to be tapped, practices to

be adopted for meeting the shortfall in targets, etc. & communicate the same to the employee. The same will result in business growth that has to align with the corporate goals and objectives.

Reward System

A well rounded reward and recognition policy is to be designed to boost employee morale and improve employee engagement, for which the redefined PMMS shall be the foundation. The consultant should suggest performance linked rewards based on the proposed solution various terms like desired Postings, Promotions, Incentives, Recognition, and Trainings etc.

1.5. Scientific Manpower Planning (Work Force Management): Transfer and Posting based on manpower planning requirements

The Bank proposes to setup a digital system for objective evaluation, forecast and deployment of manpower. This tool shall at least have the following capabilities:

- 1. To look at the current and future position and needs of the Bank to come up with an annual Man power plan based on vacancies, attritions, bank's strategy etc.
- 2. Staff requirement should be calculated on the basis of scientific formulas and algorithms with various parameters including, unit Size, unit Category, unit Geographical Location, Business Locality, Business Category, business potential, time and motion studies, etc.
- 3. Develop norms and a digital tool for manpower planning at the branch level considering
 - Business targets and mix
 - Historic performance trends
 - Operational intensity and time taken for various activities at the branch (time & motion study)
 - Strategic priorities that require branch-level execution focus
- 4. At Administrative Offices, the focus shall be on:
 - Reviewing related departments, nature of roles like technical, non-technical, etc.
 - Defining horizontal, vertical and diagonal career tracks for employees, for both specialist and general cadre
 - Detailing the movement criteria and movement opportunities for each kind of movement
- 5. Identify imbalances and develop a roadmap for addressing them
- 6. Ensure optimum tooth-to-tail ratio is maintained
