1.	35	7.1.3.9. Detailed Solution requirements Point 17	The solution to have the capability to process transactions at the speed of 1000 TPS for Central Bank of India on day of go live and should be scalable as per the Bank's growth during the contract period. Bidder should review the TPS data periodically (quarterly) and on ad-hoc basis as and when required and maintain buffer of 30 % TPS in addition to actual maximum TPS noticed during review frequency defined by the Bank and bidder or as & when required by the bank.	The solution to have the capability to process transactions at the speed of 1000 TPS for Central Bank of India on day of go live and should be scalable as per the Bank's growth during the contract period. Bidder should review the TPS data periodically (quarterly) or ad-hoc basis as and when required by Bank. Bidder to maintain buffer of 30 % TPS in addition to actual maximum TPS noticed during review and accordingly augment the hardware if required to maintain the 30% buffer. Bidder to factor the year wise cost for augmentation of hardware in the separate line item as provided in the BOM to maintain the 30% growth of TPS every year. However, in case, If TPS increases beyond growth envisaged in the RFP, the cost of augmentation will be discussed mutually for over and above.
2.	17	7.1.3 Broad Scope of Work	Clarification	Near site to DC will have database/redo logs only to achieve zero RPO from DC Minimal compute may be required for sync to DR. However, bank may ask to establish similar setup for near site for DR also in future. In such case the cost of augmentation of near site to DR will be mutually discussed.
