#### **Table DF-2: Capital Adequacy**

#### **Oualitative disclosures**

(a) A summary discussion of the bank's approach to assess the adequacy of its capital to support current and future activities

The bank carries out regular assessment of its capital requirement from time to time to maintain the capital to Risk Weight Assets Ratio (CRAR) at desired level. The capital plan is reviewed on annual basis to take care of business growth and CRAR.

The bank has adopted standardized approach for credit risk, basic indicator approach for operational risk and standardized duration approach for market risk.

The bank has put in place a well laid down Internal Capital Adequacy Assessment Process to enable the bank to plan its capital requirements in relation to its business projections and to meet the risks inherent in the business. The main objective of ICAAP exercise is to identify and measure the risks that are not fully captured by the minimum capital ratio prescribed under Pillar I; the risks that are not at all taken into account by the pillar I; and the factors external to the bank and to provide capital for such additional risks and to measure an appropriate level of internal capital as per the risk appetite. The bank has also put in place the stress testing policy to measure impact of adverse stress scenario on its CRAR.

The bank reviews the ICAAP on quarterly basis.

Bank has taken initiatives to migrate to advanced approaches for Capital Adequacy Computation, Bank has already appointed a consultant &a system integrator vendor for moving to advanced approach.

#### General qualitative disclosure requirement

A committee of board of Directors regularly oversee the Bank's Risk Management policies/practices under various risks viz. credit, operational, market etc. The bank also has separate committees for each risk comprising of top executives of bank headed by Managing Director& CEO and Executive directors such as Asset liability Management committee, Credit policy Committee, Operational Risk committee. These committees meet at regular intervals throughout the year to assess and monitor the level of risk under various bank operations and initiate appropriate mitigation measures wherever necessary.

The Risk Management Department at central office level which is headed by Chief Risk Officer (General Manager); measures, control and manages risk within the limits set by the Board and enforces compliance with risk parameters set by various committees. The General Manager is assisted by Deputy General Manager and a team of Assistant General Managers, Chief Managers, Senior Managers and Managers.

At all zonal offices and Regional office, Risk Managers are posted who act as an extended arm of the Risk Management Department of Central Office.

The bank has in place various policies such as Credit Risk Management Policy, Credit Risk Mitigation and Collateral Management Policy, Stress testing policy, Market Discipline &Disclosure policy, Intra group transaction and exposure policy, Operational risk policy, ALM policy and Market risk management Policy.

Besides these, the Loan Policy prescribing broad parameters governing loan functions, guidelines on appraisal and evaluation of credit proposals, lending powers of delegated authorities' exposure norms, prudential limits and measures, monitoring and controlling the credit portfolio is also in place.

The Credit Monitoring Department headed by General Manager monitors the loan portfolio, identify special mention accounts and take corrective measures. Loan review mechanism is also carried out by the department apart from processing and monitoring of accounts under CDR mechanism.

The bank has introduced rating models for various segments of borrowers including retail lending schemes which measures the risk associated with counterparties and helps in credit and pricing decisions. In case of large borrowers, credit risk assessment models evaluate financial risk, Industry risk, Management risk and business risk of the counter party and each of these risks are scored separately then overall rating is accorded to the counter party. Facility rating module is also available in the rating tool. Where parental support is available the same is also factored in rating, if corporate guarantee is available to the borrower.

## Policies and processes for collateral valuation and management; Bank has well defined credit risk mitigation and collateral management policy.

The main types of collaterals accepted by bank are cash and near cash securities, land and building, plant and machinery etc.

#### A description of the main types of collateral taken by the bank;

Bank accepts personal guarantees, corporate guarantees and guarantees issued by sovereigns and banks. Collaterals are valued at fair market value and at regular intervals as per the policy guidelines.

RBI guidelines recognize various types of financial collaterals for the purpose of credit risk mitigation. The guidelines further provide recognition of guarantees as one of the credit risk mitigants. Bank has put in place suitable policy measures to capture these elements.

## Table DF-7 Market risk in trading book

#### **Qualitative disclosures**

The bank has well defined Market Risk Management Policy. This policy covers all important areas of market risk measurement.

Bank defines Market Risk as the risk of loss in on-balance sheet and off-balance sheet positions arising from movements in market rates, in particular, changes in interest rates, exchange rates and equity and commodity prices.

The bank has adopted Standardized Duration Approach for measuring the capital requirements for market risk as prescribed by RBI.

#### **Policies for management of Market Risk:**

The bank has put in place board approved Market Risk Management Policy for effective management of Market Risk in the bank. Other policies which also deal with Market Risk Management are integrated treasury policy and Asset Liability Management Policy.

The policies set various prudential exposure limits and risk limits for ensuring that the operations are in line with bank's expectations of return through proper Market Risk Management and Asset Liability Management.

#### **Asset-Liability Management**

The ALM Policy is the framework of the ALM process. Bank's balance sheet has mixed exposure to different levels of financial risk. The goal of bank is to maximize its profitability, but do so in a manner that does not expose the bank to excessive levels of risk which will ultimately affect the profitability. The Policy defines the limits for key measure of risk limits that have been established to specifically accommodate a bank's unique balance complexion, strategic direction, and appetite for risk.

#### **Liquidity Risk**

Liquidity Risk is managed through GAP analysis, based on residual maturity/behavior pattern of assets and liabilities. Bank is regularly submitting LCR returns and has also put inplace contingency funding plan. Prudential limits are prescribed for different residual maturity time buckets for efficient Asset Liability Management. Liquidity profile of the bank is also evaluated through various liquidity ratios.

#### **Interest rate risk**

Interest rate risk is managed through Gap analysis of rate sensitive assets and liabilities and is monitored through prudential limits. Bank also estimates risk periodically against adverse movements in interest rate for assessing the impact on Net Interest Income and economic Value of Equity.

#### **Quantitative disclosures**

Capital Requirement for Market Risk	Capital Charge (Rs. in Mn)	
Interest Rate Risk	Rs.7824	
Equity Position Risk	Rs.5960	
Foreign Exchange Risk	Rs. 41	
TOTAL	Rs. 13,825	

#### Table DF-8 Operational risk

#### **Qualitative disclosures**

Operational Risk is the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic and reputation risks. Operational Risk Management in the Bank is guided by a well-defined Operational Risk Management Policy which is reviewed every year. The bank has initiated pro-active steps to equip itself to migrate to advanced approaches under Operational Risk and has started collation of data pertaining to Operational Risk loss events through Loss Data Management, Risk & control Self-Assessment (RCSA), Key Risk Indicators (KRI) & Scenario Analysis. Bank is also a member of loss data consortium 'CORDEx' for external loss data base.

The Bank has appointed consultant and system integrator for moving to Advance Measurement Approach.

The bank has provided capital for operational risk as per Basic Indicator Approach. Accordingly the capital requirement for operational risk as on 30.09.2018 is Rs.9222mn.

## Table DF-9 Interest rate risk in the banking book (IRRBB)

#### **Qualitative Disclosure:**

The interest rate risk is measured and monitored through two approaches:

- 1) Earning at risk (Traditional Gap Analysis)
  The impact of change in interest rates on net interest income is analyzed under this approach and calculated under yield curve approach. Under this approach a parallel shift of 1% is assumed both in assets and liabilities.
- 2) Economic Value of Equity: Modified duration of assets and liabilities is computed separately to arrive at modified duration of equity. A parallel shift in yield curve by 200 basis point is assumed for calculating the economic value of equity.

#### **Quantitative Disclosure**

Parameter of Change	Rs. in Mn
1.Impact on Earnings at 100 bps increase in interest rate across assets and liability	1704
2.Market value of Equity: 200 bps change	5102

## Table DF-16: Equities – Disclosure for Banking Book Positions As on 30.09.2018

#### **Qualitative Disclosures**

- The general qualitative disclosure requirement (Para 2.1 of this annex) with respect to equity risk, including:
  - differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and
  - Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.
- Investments in equity of subsidiaries and joint ventures (a Joint Venture would be one in which the bank, along with its subsidiaries, holds more than 25 percent of the equity) are required to classified under HTM category in accordance with the RBI guidelines. These are held with a strategic objective to maintain strategic relationships or for strategic business purposes.
- In accordance with the RBI guidelines on investment classification and valuation, Investments are classified on the date of purchase into "Held for Trading" (HFT), "Available for Sale" (AFS) and "Held to Maturity" (HTM) categories (hereinafter called "categories"). Investments which the Bank intends to hold till maturity are classified as HTM securities. In accordance with the RBI guidelines, equity investments held under the HTM category are

classified as banking book for capital adequacy purpose.

Investments classified under HTM category are carried at their acquisition cost and not marked to market. Any diminution, other than temporary, in the value of equity investments is provided for. Any loss on sale of investments in HTM category is recognised in the Statement of Profit and Loss. Any gain from sale of investments under HTM category is recognised in the Statement of Profit and Loss and is appropriated, net of taxes and statutory reserve, to "Capital Reserve" in accordance with the RBI Guidelines.
