# TVS steps into electric 3W arena with a 'King' move

ANJALI SINGH  
Mumbai, 20 January

TVS Motor Company on Monday announced the launch of its first electric three-wheeler (e3W), the "TVS King EV MAX", marking its entry into the segment. The company revealed its plans to spread sales of its e3W offerings across India within the next four-to-six months.

Priced at ₹2.95 lakh (ex-showroom), TVS King EV MAX will be available at select dealerships in the initial phase. Starting from Uttar Pradesh, Bihar, Jammu & Kashmir, Delhi, and West Bengal, the vehicle will be rolled out across India in the aforementioned time frame. This move aligns with TVS's vision of expanding its electric mobility portfolio and addressing the growing demand for sustainable transportation solutions. "We are proud to launch India's first Bluetooth-connected electric three-wheeler," said K N Radhakrishnan, director and chief executive officer (CEO) of TVS Motor Company. "We are confident that this product will set a new benchmark in the electric three-wheeler segment, with its long range, impressive acceleration, and quick charging time, ensuring high uptime for our customers," Radhakrishnan added.

During the announcement, TVS emphasised on the importance of government subsidies in accelerating the adoption of electric vehicles. The company revealed that the current subsidy framework plays a crucial role in making

Rajat Gupta (left), business head, commercial mobility, and Bernhard Heiming, CTO, TVS Motor, at the launch of TVS King EV MAX. Priced at ₹2.95 lakh, the electric three-wheeler will be available at select dealerships in the initial phase PHOTO: COMPANY

electric three-wheelers accessible. "Subsidies play a crucial role in making electric vehicles more accessible and affordable to a wider audience. It is a pivotal factor fostering growth of the e3W segment, especially in price-sensitive markets," said Radhakrishnan. TVS also revealed that the company took a deliberate approach to enter the market now as it ensured its product met the highest standards. "Our entry into this segment has been carefully planned to ensure that we bring a product that is both reliable and technologically advanced. The King EV MAX is a culmination of extensive research and customer insights, ensuring it stands out in a competitive market," Radhakrishnan further added. As per Federation of Automobile Dealers

Association (Fada)'s data in calendar year (CY) 2024, the Mahindra group sold 68,102 units of e3Ws, marking a 24.5 per cent growth year-on-year (Y-o-Y).

Bajaj, a legacy brand, also saw a 466.8 per cent (more than five-fold) rise Y-o-Y, selling 66,510 units in CY24.

The King EV MAX boasts a certified range of 179 km on a single charge, with a fast-charging capability of 0-80 per cent in 2 hours and 15 minutes, and a full charge in 3.5 hours. It offers a top speed of 60 kmph across three driving modes —ECO, City, and Power. Its features include LED headlamps, a customisable fleet management solution, and real-time vehicle diagnostics and navigation via Bluetooth. The vehicle comes equipped with a 51.2V lithium-ion LFP battery.

# PharmEasy co-founders to start new venture in consumer space

SHIVANI SHINDE  
Mumbai, 20 January

Dhaval Shah, Dharmil Sheth and Hardhik Dedhia, founders of API Holding, which runs PharmEasy, are set to start a venture in the consumer space. Siddharth Shah, chief executive officer (CEO) and managing director (MD) of PharmEasy, has also invested in the new venture in his personal capacity. Some venture capitalists (VCs), who backed the founders in their earlier venture, have also pumped in money. The founders also confirmed that this will mean they will be stepping away from day-to-day operations of the e-pharmacy startup.

"This day-to-day operational handover has always been in the works for more than a year. Now, we are glad the company is in great shape with operational cash flow break even in the last quarter. Some great leaders have now handled our day-to-day responsibilities as well," said a statement from Shah, Sheth and Dedhia. They also said: "Our commitment remains intact in the business and we continue to hold shares for the long run and value creation."

Seth, Shah and Dedhia will continue with board positions in thyrocare and API. They will remain steadfast backers to

building India's best healthcare company and repose their trust in Siddharth Shah & team, said the statement.

Meanwhile, a statement from PharmEasy stated that the other four founders also continue to be a part of the group. They align their shareholding for the long run and continue to be members/observers on the board. They plan to reduce their involvement in active day-to-day executive responsibilities.

"This transition has been in the works for a few quarters and we are delighted the new team has achieved operational

cash flow break even. It continues to handle all the responsibilities well," said Siddharth Shah in the statement.

According to a source, the founders had told the board and Shah in March 2024 that they would like to start something by themselves. "The new venture is unrelated and in a non-compete space as PharmEasy," said the source. The founders' holding in the company individually is also below 1 per cent. PharmEasy was started in 2015.

The company has raised a total funding of \$688 million. The largest funding round was \$300 million raised in 2021.

In 2023, the firm, after much struggle, raised ₹1,300 crore from Ranjan Pai of the Manipal Group.

**Siddharth Shah, CEO and MD of PharmEasy, has also invested in the new venture in personal capacity**

**KANO HAR**

**Power Transformers and Reactors**  
Building Blocks for Power and Rail Networks of Viksit Bharat 2047

KANO HAR is among India's leading transformer manufacturers with a wide range of indigenously developed portfolio comprising Power Transformers upto 500MVA 400kV, Shunt Reactors upto 125MVAR 400kV, Scott-connected Transformers upto 100MVA 220kV and Traction Transformers upto 30.24MVA 220kV.

Today, KANO HAR stands as India's first and only manufacturer to successfully short circuit test all three key transformer ratings essential for power transmission and high-speed rail networks—500MVA 400kV and 100MVA 220kV & 132kV Scott-connected transformers—having achieved over 215 short circuit tests at independent labs like CPRI and NHPTL, likely the highest count globally.
